Alger Light with LED
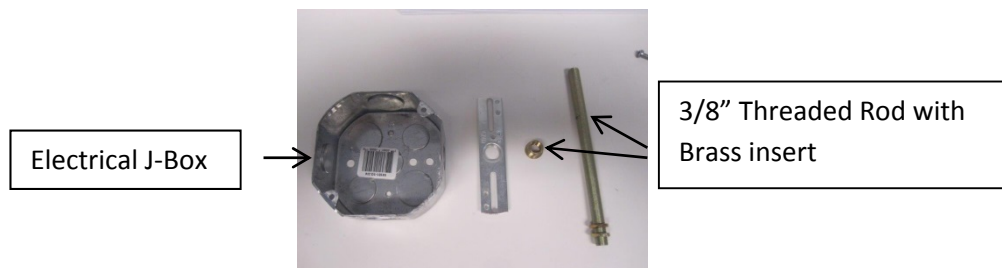

*Installation Hardware*

The following pictures illustrate the basic hardware and technique for installing the Alger Light with LED onto a ceiling.

- Installation hardware:

Electrical J-Box

3/8" Threaded Rod with Brass insert

- Thread brass insert into mounting bracket (to be attached to J-Box)

- Thread rod through sheetrock and into J-Box (*Note: J-Box must be secured to permanent structure*)

Threaded Rod should extend 4 ¼" below ceiling surface

- Secure light to the ceiling with nut and washer (threaded rod goes through the light)
